

E-Learning

Sankara Nethralaya
Chennai 600 006

E-Learning

- E-learning is the unifying term to describe the fields of online learning, web-based training, and technology-delivered instruction.

E-Learning

- Traditionally, teaching is done in classrooms as a direct communication between a teacher and student.
- This is still the most common way of imparting knowledge in school and colleges.

E-Learning

- In the present day environment, where technological advancements have led to rapid expansion of the frontiers of knowledge in IT.
- This is all the more essential in India being a developing country to improve the quality of life and Healthcare delivery system.

E-Learning

- There are various methods of disseminating knowledge :-
 - Class Room based
 - E-Learning :-
 - Computer and Internet based
 - Tele-connectivity based
 - TV Channel based

E-Learning - Benefits

- Cost-Effectiveness
- Just-In-Time Training
- Flexibility
- Customization
- Measurement
- Variety

E-Learning

- Sankara Nethralaya launched its e-Learning website <http://www.ekalavya.org> in November 2003.
- The site aims at providing educational materials for Ophthalmologist as well as non-ophthalmologist such as optometrist, nursing assistants and other paramedical professionals involved in eye care.

Towards Excellence

This portal addresses a variety of people involved in the delivery of eye care. Programs have been custom made for each specialty concerned. For example: Ophthalmology, Optometry, Ophthalmic Nursing etc.

There are structured courses in various subjects. Grand rounds are an important aspect where in once in 7-15 days a new case will be posted on the web along with a discussion. Readers are encouraged to participate in the discussions.

The course content is written by experts in each field and contains practical information that is not present in standard text books. The subject is presented in easy to read format supported by pictures and animations where necessary.

Welcome Rachapalli Reddy Sudhir

Dear User,

Learning is more than just acquiring knowledge. It is about discovering yourself, shaping your attitude and building your self-confidence. Sankara Nethralaya has carefully chosen its delivery mechanism so that we may inculcate the above qualities in you. We have just entered the new millennium, the Internet age. Young people like you are needed to take the world beyond browsing, beyond information processing to knowledge networking. Only people who have both theoretical underpinning and relevant practical skills can meet this challenge. The challenges are many but the rewards too are many. More than any material reward, it is your feeling that you have contributed to the new world order that motivates you.

With best wishes
Director Sankar Nethralaya

Course Communications

More Information

LiveTalk – LiveTalk is a special technology developed at JHSPH which works just like a radio call-in show for the Internet. Students listen to the course faculty and their guests via a live audio stream over the Internet, and students communicate via text chat with faculty and other students. Click "Show Me," to the right, for a demonstration. [Show Me](#)

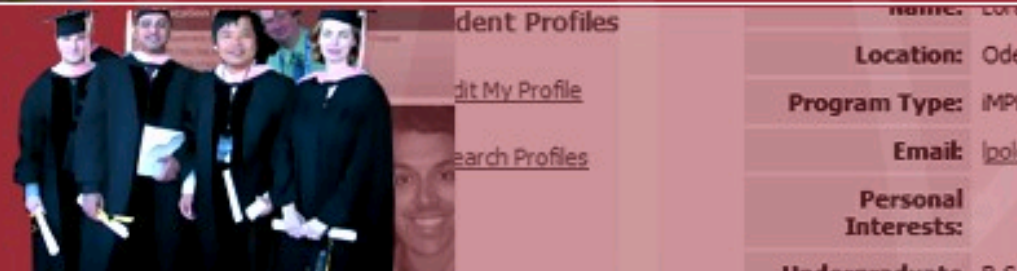

BBS – Our threaded discussion system (including polls, private work spaces, and document sharing) provides for rich communication among the entire class.

DED Messenger – Messenger is a voice chat tool that lets small groups of users communicate by talking, in real time, over the Internet. Messenger is frequently used for virtual office hours and group assignments.

Email – Email communication plays a key part of any online course. Class-wide messages are archived for future reference on an easily accessible page.

Community of Students – All of our courses are designed to foster a sense of community among students, faculty, teaching assistants, and guest lecturers. Students can post more detailed information about themselves in their personal profile, which is available to all students enrolled in a specific course.

Bill Kirkland: I would think that it would work best if you weren't going in to the field.

Jennifer Smith: But isn't that letting your target population down?

Henry Walters: I agree with Jennifer.

Message From The Organizers

Dr L Vijaya

Organizing Chairperson
Sankara Nethralaya

Dr G Chandra Sekhar

President
Glaucoma Society of India

SEAGIG 2006 is honoured upon India and the "jewel of the south" Chennai has the privilege of hosting this important meeting. December 1-3, 2006 will be the time for us to gather and continue our efforts to better our knowledge on the science of Glaucoma.

We all are aware that the approach to management of this major public health problem has undergone a "sea change". The profile of this disease has an additional spectrum that is peculiar to this region of the world and there continues to be a need for us to persist and upgrade our information. Meetings and exchange of ideas are necessary aspects of this process and SEAGIG 2006 is one such
