

**The very thought of going blind is frightening.
It should not happen to anyone.
Yet, thousands continue to live in the dark
awaiting sight restoring eye transplantation.**

Every **five seconds** one person goes blind.
And a child goes blind every **minute**.
Our nation requires **1 lakh eyes** every year.
But only about **17,000** eyes are donated.
Less than **1%** of the pledged donors' eyes are
actually presented to the Eye Banks by their
families.

Thousands continue to live in the dark awaiting
eye transplantation.

**Is it not our responsibility to make them
see our beautiful world?**

How can we help?

When there is a death in the family or
friend's family, request them to donate the
eyes. Talk to the close relatives of the
deceased about eye donation and how their
gesture will bring in light into two lives.

**Let us Donate Eyes
and bring Light
to their lives**
